

## Information on paper presentation

### STC 2017

Contributions can be presented in form of a lecture only. The lecture should not exceed **10 min** in time. The remaining time (approximately 5 min) is devoted to questions from the members of evaluation committee or the audience. During registration of the contribution, it is necessary to choose the language for presentation. Undergraduate students (bachelor and master study) may present their contributions in Czech or English. Postgraduate students (doctoral study) can present their work only in a foreign language (any language in the list available at registration).

All lecture rooms are equipped with a PC (PowerPoint 2007), projector, and overhead projector. There will also be available a presenter for remote switching of slides equipped with a laser pointer. When preparing slides it should be kept in mind that the presented content is easy to read (text, labels in graphs, etc.).

Presentations in PowerPoint **should be loaded to computers before the section proceedings start!** Time schedule of lectures in each section of the conference will be/is presented in the conference program (check the website for actual information). Question relating to technical or software equipment of lecture rooms can be addressed to secretary of particular section (see the conference program on the website).
